

ERD for pediatric departement

-AuditLog.performed_by → SET NULL if **user is deleted**
-Append-only table — records are never updated or deleted
-**Tracks:** Patient (created/deleted), MedicalFile (updated), Document (created/deleted/visibility_toggled)

username:Inherited from Django's AbstractUser — automatically generated. Not entered by the user and not displayed in the interface.

ON DELETE PROTECT: - guardian_Id (Patient) → patient records must survive guardian account changes - patient_Id (Medical_file) → medical file is owned by the system, not the patient

-Mis à jour à chaque modification du dossier. Nullable (NULL si jamais modifié depuis la création). ON DELETE SET NULL

Nullable fields (optional foreign keys)
MedicalFile.last_edited_by_id → NULL if never modified
• Appointment.patient_id → NULL for external (guest) patients
• VaccinationRecord.next_dose_date → NULL if no next dose scheduled
